Dog Owners

We strongly recommend that all dogs be current on the vaccinations and tests below. **Please check below all that you would like done for your pet today.**

- Rabies vaccine- Required under state law- **Required**
- Distemper/Parvo vaccine- Strongly recommended for all dogs
- Bordetella vaccine (kennel cough) recommended once yearly - **Required**
- Heartworm test- Recommended if not currently on heartworm preventative to minimize anesthetic risk
- Fecal- Recommended yearly for intestinal parasites such as roundworms/hookworms/whipworms

Cat Owners

We strongly recommend that all cats be current on the vaccinations and tests below. **Please check below all that you like done for your cat today.**

- Rabies vaccine- Required under state law- **Required**
- Feline Distemper vaccine- Strongly recommended for all cats
- Feline Leukemia- Strongly recommended for outdoor cats or multiple cat households
- Feline Aids- Recommended for outdoor cats
- Fecal test- Recommended yearly for roundworms/hookworms/tapeworms
- Feline Leukemia/Aids test- Recommended for any cat with unknown status

Pre-anesthetic blood testing

In order to reduce anesthetic and surgical risk as much as possible, we recommend blood work before any procedures to diagnose problems that may not be visually evident such as liver disease, kidney disease, anemia, infection, diabetes, and electrolyte abnormalities. If abnormalities are found we will contact you before any procedures are done and discuss any recommendation we have. **Pre-anesthetic blood work is required for all patients over 7 years old and must be current within the last 3 months.**

- Yes, I would like pre-anesthetic blood work
- No, I decline pre-anesthetic blood work.

Intravenous fluids

A catheter will be placed in your pet's leg prior to anesthesia; this gives us quick access to the bloodstream in the case of an emergency and can be used to give life-saving drugs and fluids. In addition, your pet has the option of receiving IV fluids during and after surgery to maintain blood pressure and quicken recovery. **IV fluids are required for any patient over 7 years old.**

- Yes, I would like IV fluids for my pet
- No, I decline IV fluids

Post-operative pain meds

- Yes, I would like pain medication for my pet
- No, I decline pain medication

Microchip

- Yes, I would like my pet microchipped

Authorization

I authorize the use of the appropriate anesthesia/medications judged necessary by the veterinarian. I understand that even with every conceivable precaution taken; anytime an animal is anesthetized there is a risk that an adverse reaction may occur potentially resulting in death. I understand that during the above listed procedure/surgery, an unforeseen medical condition may become evident that necessitates an extension of or an addition to the procedure. I authorize the performance of any procedures deemed necessary in the professional judgment of the veterinarian. I understand that the results of any procedure cannot be guaranteed.
